

Expository Writing: Exploring Different Types

What is Expository Writing?

- Expository writing explains or informs about a topic
- It's like teaching your friends about something you know
- You use facts and details to make things clear
- Can you think of a time when you explained something to a friend?

Why Do We Use Expository Writing?

- To share information with others
- To teach people new things
- To explain how something works
- What's something you'd like to explain to the class?

Type 1: Descriptive Writing

- Describes what something looks, feels, sounds, smells, or tastes like
- Uses lots of details to paint a picture with words
- Example: Describing your favorite toy
- What would you describe to your classmates?

Type 2: Sequential Writing

- Explains steps in order, like a recipe
- Uses words like "first," "next," and "finally"
- Example: How to make a peanut butter sandwich
- Can you think of something you do in steps?

Type 3: Compare and Contrast

- Shows how things are alike and different
- Uses words like "similar," "different," and "but"
- Example: Comparing cats and dogs
- What two things would you like to compare?

Type 4: Cause and Effect

- Explains why something happens
- Shows how one thing leads to another
- Example: Why leaves change color in fall
- Can you think of a cause and effect in your life?

Type 5: Problem and Solution

- Describes a problem and how to fix it
- Gives ideas to make things better
- Example: How to stop littering in the park
- What problem would you like to solve?

Tips for Good Expository Writing

- Use clear, simple words
- Stick to the facts
- Organize your ideas
- What else makes writing easy to understand?

Practice Time!

- Choose a type of expository writing
- Pick a topic you know well
- Write a short paragraph
- Who wants to share their writing with the class?

Remember

- Expository writing helps us share what we know
- There are many types to choose from
- Practice makes your writing better
- What was your favorite type of expository writing?
