

Assignment 2

Course Code: CS-202

Course Title: Artificial Intelligence

Total Marks: 15

Assigned Date: 01-12-2025

Name: _____

Registration No. _____

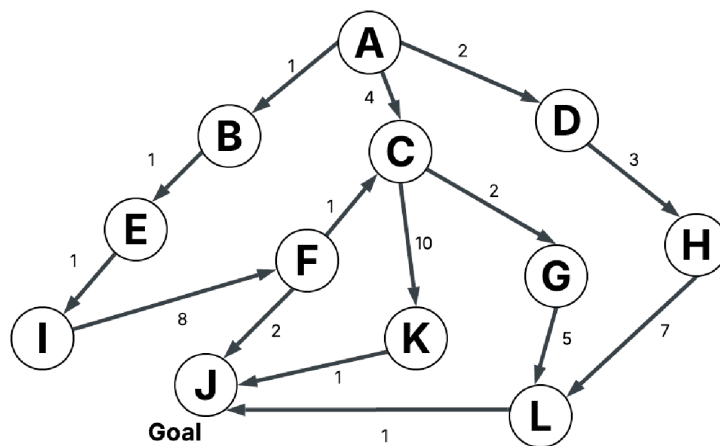

Discipline/Semester/Section: BSCS 3rd B

Deadline: 04-12-2025

[CLO2, GA3, C3]

Q1: Implement the following:

- Apply the** Uniform Cost searching algorithm on given Figure to find a path from the start node (A) to the Goal node.

- Apply Depth First Search (DFS) and Iterative Deepening Depth First Search (IDDFS). Also apply Depth Limited Search (DLS) with limit=1 on the following tree to find a path from start node (A) to Goal node(I). Explain the difference between all these algorithms in terms of the path found.
